

HOLLYWELL

Environmental Policy Statement

It is the policy of Hollywell Building Services to comply with all relevant legal requirements, industry standards and best practice. Hollywell Building Services shall manage its activities so they are acceptable to our customers and the community at large and ensure that environmental impact is reduced to a practicable minimum. Where possible, activities shall provide positive benefit to society e.g. through re-use/recycling.

There are four areas in which we will positively influence environmental awareness and compliance and protect the environment:

- In support of our core activities, we will ensure that our process for procuring consumable supplies maximise the use of biodegradable fluids and sustainable raw materials, those that can be recycled and those that have already been recycled, with due regard for the life cycle of the end product.
- We will ensure that our process for disposing of all waste materials allow compliance with applicable legislation / duty of care obligations and maximises the possibility for the segregation of waste that can be recycled from that which can't.
- We will maximise the efficiency of our use of consumed energy through the adoption of an efficient transport policy for our personnel and the control of the use of our electrical supplies and consumables at premises under our control.
- We will promote the highest standards of environmental excellence in customer organisations by matching our project environmental controls with the policies of our customers.

Hollywell Building Services shall:

- Encourage and promote best practice and continual improvement in environmental performance.
- Commit to the prevention of environmental pollution and protection of the environment in relation to Hollywell Building Services activities.
- Aim to minimise the environmental impact for the life cycle; (including disposal), of plant, equipment, and other physical assets under our control.
- Provide information and assistance to ensure that materials are used, stored and disposed of in a safe and environmentally responsible manner.
- Promote the open exchange of environmental information with customers and suppliers and provide appropriate environmental training.
- Comply with the requirements of its customer's environmental policies.
- Set and monitor appropriate environmental objectives.
- Operate an Integrated Management System certified to BS EN ISO 14001:2015

In establishing its core values, Hollywell Building Services Limited is committed to achieving its business objectives in a caring and responsible manner by considering the economic, social and environmental impact of its activities alongside its key business issues.

We are committed to identifying and undertaking activities over and above compliance with the minimum legal requirements, in order to address both our own competitive interests and the interests of wider society as a whole.

In doing so, we strive to uphold the following principles:

- To treat all employees fairly
- To operate with integrity
- To respect basic human rights
- To sustain the environment for future generations
- To be a caring and responsible member of the communities in which we operate.

This policy Statement will be formally reviewed on an annual basis.

Signed:

Bob Stephen
